

# REALITY CAPTURE SERVICES

**CAPTURA**  
PRACTICAL INTELLIGENCE

## METROLOGY GRADE

**USES:** Reverse engineering, part verification, pipe/vessel inspection

- » Scans objects up to 25ft in length
- » Output to fabrication drawings, CNC machine, 3D printer
- » Accurate up to 0.0009in.

## TERRESTRIAL

**USES:** Scope area scanning that needs high accuracy

- » Robust online viewer with panoramic images, measurements, annotations, attachments
- » Accurate up to 1/16in.

## MOBILE

**USES:** Large areas, plant unit scans, architecture and construction, municipality, etc.

- » Large area capture in fraction of time compared to terrestrial/tripod scanning
- » Robust online viewer with panoramic images, measurements, annotations, attachments
- » Accurate up to 1/4in.

## VIRTUAL TOUR IMAGING

**USES:** Perfect for homes, apartments, hotels, commercial buildings

- » High resolution imaging
- » Great for virtual property walkthroughs for sales and marketing purposes
- » Robust online viewer with panoramic images, measurements, annotations, attachments

## DRONE/AERIAL

**USES:** Large areas, roads, infrastructure inspections, pipe racks, etc.

- » Largest area in shortest time
- » Accurate up to 1in.
